

Electrical helmet with a modern design offering complete protection against arc flash

ONYX2CL2

Safety helmet equipped with an integrated visor certified according to IEC62819 Class 2 (electric arc), a new generation 6-point textile cap with an intuitive adjustment system.

Comfortable distance between the visor and the user's face

Allows the user to wear glasses. Prevents fogging.

Dual position easy lock

Optimum safety: The visor doesn't move. Optimal handling with or without gloves.

Neck guard

Protection against electric arcs for areas not covered by the visor.
