

DONNA S3S SR

Just feeling good in your sneakers

EN ISO 20345:2022

S3S SR FO CI ESD

35 to 42

UPPER

- Microfiber upper with TPU laminated vamp: **lightness & breathability.**
- Breathable **2,8mm** 3D mesh lining: Covering **100%** of the shoe, **best comfort even under toe cap _ 330g/m²**
- **6mm** padded collar: Best comfort when putting the shoe _ **80kg/m³** (stability)
- **6mm** padded tongue: Best comfort when flexing the foot _ **50kg/m³** (cushioning)
- ESD electrostatic dissipative footwear, compliant with the standard 61340-4-3 
- Composite Toe cap: **Thermal insulation** and **lightness**
- Composite plate: Stitched directly into the upper and **covering 100% of the foot** for a full protection
- **TOE-CAP SMOOTH EFFECT:** Sensation of freedom when putting the feet inside the shoe, under the toe cap
- **SUPPORT & CUSHION:** Maximizing stability and cushioning

FOOTBED

- Specifically developed to fit the shape of **women's feet;**
- The volume in a front ensures a precise fit and stops the feeling of floating.
- **Bi-density Open-Cell** Polyuréthane footbed: **Best elasticity and cushioning** during time
- **3mm** Drop:
- **6mm Rear part: Shock absorber and cushioning**
- **3mm Front part: Propulsion and stability**

OUTSOLE

- Diagonal lines on Rear & Front part: Specially designed for the best slip resistance
- Angular cleats: Better slip resistance
- Optimized fluid evacuation channels
- Flexing line: Better comfort when flexing the foot
- **WEAR OFF INDICATOR:** Know when to change your shoe
- Monitoring of **density / hardness:** Optimal performance & comfort
- Hook lines under the arch of the foot for climbing ladders
- Outsole design especially optimized for Indoor floors: **best grip and shock absorption**

Technologies

WEAR OFF
Indicator

WEAR OFF INDICATOR

1. Know exactly when to change the shoe
2. Keep track of the performance of your shoe
3. Monitor your PPE stock

SUPPORT
CUSHION

SUPPORT & CUSHION

1. 3D shaped heel counter to maximize stability
2. Anti torsion shank inside the sole
3. Monitoring of sole density / hardness for the best cushioning

TOE-CAP
SMOOTH EFFECT

TOE-CAP: SMOOTH EFFECT

1. Complex foam + lining construction
2. Smooth effect around the toes without feeling the toe-cap
3. Custom made strip ensuring optimal comfort even during the flexion of the shoe

LADY
FIT

LADY FIT

1. It's adjusted to the shape of the women foot
2. The footbed keeps it's properties over time
3. Optimal shock absorption and confort all day long

Test results vs EN ISO 20345:2022

Slip resistance (SR test): **+40%**

Toe cap - compression resistance: **+26%**

Toe cap - impact resistance: **+20%**

Composite perforation-resistant insert (Type PS): **+21%**

Heel energy absorption: **+42%**

Flexing resistance: **x20** above the standard
