VB-60: Dielectric Visor Bracket

The VB-60 is ideal for electric ARC and other applications where non-conductive materials are a requirement.

VB-60

Head Strap Attachment End

The newly designed head strap attachment end provides a strong, secure fit on most caps without the need for adjustment.

VB-60 Overhead Center Position

Balances and distributes the weight of the shield evenly.

VB-60 Visor Bracket

Dielectric construction ideal for electric utility applications.

Fits most cap style hard hats!

Product Features:

Strong ratchet spring firmly holds face shield in the up or down position.

Overhead center position feature evenly balances and distributes the weight of the shield.

Made of Triax 1120 - A combination of high strength nylon and ABS, with more impact resistance than either. Can hold the heaviest visors on the market.

More temperature resistant than ABS; 365°F vs. 221°F.

Universal hole pattern on visor bracket enables you to mount our full face face shield line onto most major safety cap brands.

Meets ANSI Z87.1 and EN-166 standards.
