VB-50 Visor Bracket

Anodized aluminum construction ideal for metal foundry and high heat applications.

Product Features:

Strong ratchet spring firmly holds visor in the up or down position.

Overhead center position feature balances and distributes weight of the shield, even in the "up" position.

Made of aluminum, which provides a combination of high strength and impact resistance.

Holds the heaviest visors on the market.

Recommended for use with Gold and Weld Shade shields.

Ideal for use with non-slotted safety helmets.

Universal hole pattern provides a mount for most face shields.

Product Number: WELVB50
