

Iron shield for **precision handling**

VENICUT A901

EN388

4X42F

EN407

X1XXXX

ANSI ISEA 105

A9

High cut resistance: level A9

The highest level of cut resistance **in the world**.
Ideal for intense, heavy-duty work over long periods.

Precision handling

thanks to an 18-gauge that molds perfectly to the shape of the hand.

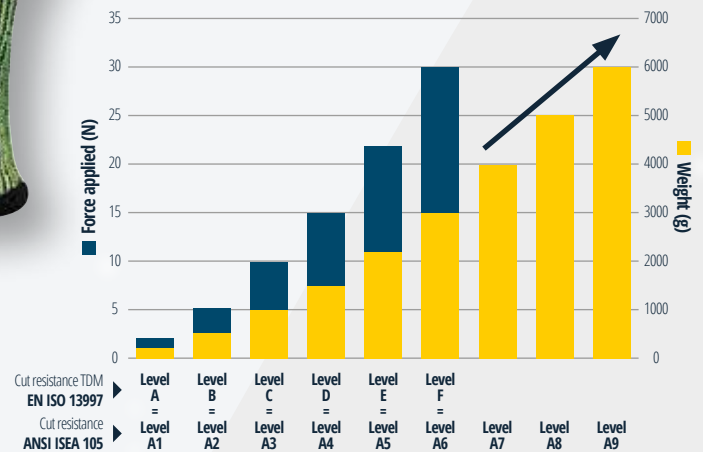

Compatible with all environments

thanks to its nitrile coating, it is suitable for work requiring water and oilproofing, but can also be used in dry conditions.

Tactile

Equivalence of the cut-off
between the European standard and the ANSI* standard

*EN ISO 13997 & ANSI ISEA 105 have approximately different test methods.

8 → 11
