CLASS 1

TROUSERS / BERMUDA SHORTS
 <p>900PANHV FARGO HV M1PA2HVCL1 M1BE2HV</p>

Our trousers with kneepads comply with the EN 14404 standard.

Class 3 can be achieved with one product in this class (e.g. a jacket), or with two items combined. In some cases, a complete set of class 2 tops and bottoms can be used to obtain class 3 high-visibility clothing.

* For products with removable sleeves, the class mentioned is guaranteed if the product is worn with the sleeves.

When should high-visibility clothing be worn?

High-visibility clothing is PPE workwear governed by standard EN 20471. It is essential when working in low-visibility conditions, particularly on the roads. Lack of visibility is a fatal occupational hazard.

Wearing high-visibility warning clothing is therefore compulsory for many professionals. In fact, the French Labour Code 'requires individual high-visibility signage in situations where it is necessary, or even essential, to be seen'.

The Interministerial Instruction on Road Signs and Signals specifies the conditions for wearing high-visibility work clothing: 'any person working on foot on the road during a worksite or in the event of a temporary hazard must wear class 2 or 3 high-visibility signalling clothing'.

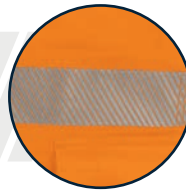

Which class should I choose for my high-visibility clothing?

EN ISO 20471	CLASS 1	CLASS 2	CLASS 3
	RISKS		
	—		+
	Basic protection Speed ≤ 30 km/h	Intermediate protection Speed between 30 km/h and 50 km/h	Reinforced protection Speed between 50 km/h and 90 km/h
Light conditions	Daytime work	Working during the day or in twilight	Daytime or night-time work
Risks	Risk of collision and low visibility requirements	High risk of collision and need for visibility	Very high risk of collision and need for visibility
Place of work	Car park, building, village, town centre, country lane	Country lane or road or town centre	National roads, motorways
Sectors of activity	Logistics platform, maintenance or road safety agents	Construction, public works, courier services	Construction, public works
Reflective tape surface	0.10 m²	0.13 m²	0.20 m²
Fluorescent fabric	0.14 m²	0.50 m²	0.80 m²
