VB-65: Full Brim Dielectric Visor Bracket

Fits full brim hard hats from all major brands! Attaches ARC rated face shields for ARC Flash compliance.

VB-65 Visor Bracket

Easily attaches to all full brim models from major hard hat brands.

Add economical face shield protection for utility, oil and gas, and construction site workers.

Product Features:

Can hold a variety of face shield options, quick and secure, on full brim hard hat offerings from all major brands.

Strong ratchet spring securely holds face shield in the up or down position.

Holds face shield in a "ready to use," evenly balanced position, over the top of the hard hat, out of the way of the worker, to reduce interference with work activities and improve comfort.

Helps full brim hard hat users comply with the Electric Power Generation, Transmission, and Distribution Maintenance and Construction requirements (29 CFR 1910.269 and 29 CFR 1926, Subpart V) for ARC Flash protection.

Dielectric/Non-Conductive construction for electrical applications.

Meets ANSI Z87.1 standards.

Product Number: WELVB65
