RXP-100™

RXP-100™ prescription ready safety frame can be fitted with prescription safety lenses for individual vision correction with ANSI Z87.1-2010+ protection.

Nosepiece with CoreFlex™ Technology
Provides Custom Fit

Pantoscopic Angle Adjustable
Temples

RXP-100™

Contemporary design with removable Plano lens that can be replaced with your prescription.

Product Features:

Clear lens carrier. Accepts prescription safety lenses and provide wraparound protection.

Removable brow cushion provides added protection from falling particles.

Ratcheting temple adjustments allow pantoscopic angle adjustment for a customized fit on a wide range of facial shapes.

CoreFlex™ technology integrated into the nosepiece allows wearer to bend and shape nosepiece for a comfortable, customized fit.

Stylish frames come fitted with a 2mm polycarbonate Plano lens, making them ANSI Z87.1-2010+ compliant safety glasses.

Other Key Product Features:

Soft, over-molded temples with a semi-drop design for a secure fit.

Meets ANSI Z87.1-2010+ High Impact Protection standard.

How It Works:

To insert your prescription lenses into the safety frame, take the RXP-100 frame to your eye doctor or optometrist. They will trace the eyewire of the frame and your prescription lens to fit the frame.
